(54) Title: **METHOD OF DIGITAL EXPOSURE MODIFICATION OF IMAGES**

(57) Abstract: A method of digital exposure modification of shot images of a photographic support (10) comprising the shot images (12) and at least one sensitometry control (16), the method comprising the following steps: a) the digitization (20), in more or less the same conditions, of the images and the sensitometry control, in order to link at least one digital code to the image pixels and the sensitometry control pixels, b) the establishment of at least one sensitometry relationship (22) from the various exposure values of the sensitometry control and the digital codes linked to the pixels corresponding to these values, c) the shift of at least one part of the digital codes of the image pixels, each code being shifted by a value established according to a required modification amplitude of the exposure and, with respect for the sensitometry relationship.
